Education

Guru Jambheshwar University of Science and Technology

2021 - 2025

Bachelor of Technology in Information Technology, CGPA- 6.7

Hisar, Haryana

Lohia Charan Singh College

2018 - 2020

Bihar School Examination Board, 12th, Aggregate- 79.6

Darbhanga, Bihar

Relevant Coursework

- Data Structures and Algorithms
- Database Management System
- Object Oriented Programming
- Operating System
- Computer Networks

Projects

TravelWorld | JavaScript, EJS, Node.js, Express.js, MongoDB [View TravelWorld](#)

February 2023

- Developed a travel platform using HTML, CSS, JavaScript, and EJS, enabling users to register, log in, and post travel images with detailed pricing information.
- Implemented a rating feature allowing users to explore and rate travel destinations, improving user engagement and providing valuable feedback for travelers.
- Integrated MongoDB for data storage efficiently handling user profiles, travel posts, and rating data in a structured database system.
- Focused on responsive design to ensure the platform is accessible across devices, enhancing user experience on both mobile and desktop.

ImportFolio | React.js, Node.js, Express.js, MongoDB, Firebase [View ImportFolio](#)

October 2023

- Designed and developed a dynamic portfolio creation platform utilizing React.js for the frontend, and Node.js with Express.js and MongoDB for a robust, scalable backend architecture.
- Implemented Firebase Authentication for secure user access enabling seamless registration, login, and logout functionality with token-based security, ensuring data protection and user privacy.
- Engineered a fully customizable portfolio system allowing users to build and personalize their professional profiles, showcase projects, and highlight achievements with real-time updates.
- Optimized full-stack development workflows integrating modern web technologies (HTML, CSS, JavaScript) with RESTful API architecture, enhancing performance, user experience, and scalability across devices.

ShopStar | React.js, Node.js, Express.js, MongoDB [View ShopStar](#)

April 2024

- Developed a full-featured eCommerce platform using the MERN stack (MongoDB, Express.js, React.js, Node.js), providing seamless user registration, login, logout, and personalized dashboards for both users and administrators.
- Implemented secure payment integration allowing users to place orders and manage shipping addresses, ensuring a smooth checkout experience with order tracking.
- Built an admin dashboard for comprehensive management enabling administrators to view and manage user accounts, track orders, update order statuses, and handle the shipping and delivery process efficiently.
- Optimized backend functionalities for order management and delivery tracking, with role-based access control, ensuring administrators can oversee all user activities while maintaining security and operational efficiency.

Technical Skills

Languages: C, C++, JavaScript, SQL, HTML, CSS, Tailwind CSS

Frameworks & Libraries : React.js, Express.js, Node.js, MongoDB, Mongoose, Firebase, Redux

Tools & Platforms : GitHub, Postman

Achievements

- Solved over 1,000 Data Structures and Algorithms (DSA) problems on Multiple platforms such as GeeksforGeeks and LeetCode
- Achieved 3rd place on the GeeksforGeeks College Leaderboard.
